

Good morning. My name is Boris. I have information about Snowden disclosures that I would like to share...Yes,I can wait" It was rainy November morning in New York City and I don't use umbrellas. I was calling from a public phone.For all intents and purposes I could call from my cell phone. But I didn't want to get GRU involved. Not yet. The AP building was next block. I was sure that the receptionist would eventually transfer me to Head of Security.That's why I chose AP. If I would contact the regular newspaper or broadcasting company, they could actually put me through to some cub reporter,so he can have an educational experience with me.And that was not my plan.My plan was simple.It was clear were Putin headed. And somehow I had to stop him. And the only way to stop him was to expose myself.I needed to open a one way communication line to certain people.And what was a better way to do that, then having NSA hooked on all my emails, texts, phone conversations, etc. And who knows, one day they might put me under 24 hour surveillance. But for now, phone and email would do. In 1991, when I just immigrated, my "friends" from Moscow orchestrated a first surveillance of mine by FBI. It lasted just a few month.I was obviously too "dumb" to have any ties to any intelligence organization.Things changed after Gek Bocharov paid a visit. He was one of the most accredited Russian journalists. He also was a Colonel of GRU at a time.Everybody knew that journalism was just a cover, so him visiting me in definitely raised a red flag in FBI CI unit.I was watched for 2 years or so. But after a few years they decided that it was just what it was on a surface - a family friend; who happened to be a Russian spy. Nothing to it.... This time around had to be different. I needed their undivided attention. So I had to give them something serious. Something that would put me under surveillance for a very long time... "Griggs speaking. How can I help you?" So far everything was moving along as planned. Mr.Griggs was a head of Associated Press NYC Security. Ex Secret Service. Of course would be better if he'd be ex CIA. But I was not playing a lottery. Secret Service it is. Over the next three meetings I shared with him my knowledge of OBL transfer from Afghanistan to the CIA Annex in Benghazi as well as the role Stevens played in delivering OBL to Russians. And butchered by Petraeus op to eliminate Stevens and tie the loose ends. I also described in smallest details Putin's use of Snowden disclosures as a communication channel to Obama. The channel that Putin employed to blackmail and eventually recruit the President Of the USA. He was listening to me carefully, with no emotions. Only one time I saw him surprised when he heard that GRU gave Bin Laden back to Al Qaeda so they can kill and bury him. Up till now folks in US Intelligence Community thought that Russians did the dirty job themselves. He did not ask me where and how I got the info. He was professional. He asked me what I want. I thought for months before I called AP, what my answer should be, when he asks me that question. I bluntly told him that all I wanted was to stay above the radar. He only smiled when he heard that. First time I saw him smiling. He said "Thank you, but I don't think that Associated Press can use your information. I am sure that you would not be able to corroborate it with actual documents, recordings, videos, would you?" We clearly understood each other from the very beginning. I was as polite and cordial as he was,"You know I can't share the actual emails, texts or recordings with you Mr.Griggs. But I do understand and appreciate your position. Have a great day." The day was November 14, 2013. I was sure that from now on all my emails, phone conversations, texts, meetings, travel habits and other movements not only be recorded, but also analyzed on highest levels of NSA, FBI, CIA and National Intelligence. So far everything was moving as planned.

.....

.....

Some say that the operation "Capital" was started by Bukharin (One of the leaders of Bolsheviks Revolution and close ally of Vladimir Lenin and Josef Stalin) in the early 1920s. Some say Merkulov(Head of NKGB between 1943 and 1946) came up with the whole idea at the end of the war. Some say it was a myth created by soviet intelligence officers and circulated both here and in the Soviet Union. Honestly, I don't know. They do attribute to Bukharin the famous saying "Rome wasn't conquered by Gunns. Rome was destroyed by the Romans." And that was essentially the idea behind the whole thing- if you can't conquer the world - have it self destruct from inside and build a new one on the ruins. What I do know is that quite a few prominent American, British, French, German, Italian and Israeli figures did and do work as Russian agents. One of the best examples is the billionaire Maxwell who "drowned" in Spain in 1991. Majority of his billions simply vanished with him. Soros is another. Avigdor Lieberman is the latest one. The idea was simple - to recruit and promote bright, young individuals within the Western world so they could achieve high positions in whatever field they represented. Politicians, lawyers, businessmen, journalists, etc- to promote communist ideas and sabotage Western countries in any way possible without being contacted by soviet intelligence. This would ensure that they would never be caught. You see, the only way an agent could get caught is if he or she is communicating. If there is no contact, there is no chance of exposure. In 1991, the Soviet Union collapsed. It was followed by demonstrations and people's uprising. Central archive of KGB as well as KGB headquarters square were raided. Anyone could walk in and get whatever information they wanted. The Central Committee offices of CPSU in Moscow also was raided. Kuchina, who was the head accountant of Communist Party of Soviet Union, "committed suicide" by jumping out from the 26th floor of the CPSU headquarters building on August 26, 1991. The building was glass and concrete. Windows were sealed. In order to open the window, you needed to bring a swat of special agents. Somehow, he managed to open it and jump out. \$11 billion of Communist Party money disappeared with him. Maxwell "drowned" on November 5, 1991. One year later, on 09.16.1992 George Soros tanked The Bank of England with \$11 billion of someone else's money. No one paid attention where the money came from. Every one was hypnotized with boldness and grandeur of the Soros game. And nobody caught the obvious - Soros didn't care whether he would win or lose. Of course we all know what went down in history - he collapsed the Bank of England and made \$1 billion. The problem is that he didn't care. If he would lose 2 billion, he would still get a billion in commission for the biggest money laundering operation ever. Soviet economy was collapsing prior to that. Gorbachov desperately needed the influx of western capitals. The US was hesitant. Western Germans agreed in exchange for unification of Germany. The agreement was an unprecedented investment of German capital into Soviet's economy for breaking the Wall and uniting Germany. The only remaining issue was the army of KGB operatives as well as Stasi informants. It would be impossible for United Germany to keep its independence from Russians should KGB remain its enormous apparatus in Germany with over 100,000 people - Stasi informants, Germans recruited by KGB and Soviets spies - at their services. Obviously both Kohl and Schoeder prioritized the elimination of Soviets 5th column in Germany. Gorbachev ordered Putin to deliver the NOC list as well as all the top secret KGB files with information on KGB entire activity in

both Eastern and Western Germany. Almost all the KGB agents in Germany was apprehended shortly thereafter, and few that was not apprehended, were monitored. Later on, few people who new of Putin's involvement -like Stasi General Horst Bohm-"committed suicide" or died of "natural"causes. Putin later claimed that he "destroyed" all the KGB files in order for them not to be captured by angry German citizens on November 9,1989 when the Germany Unification prompted attack on KGB offices in Dresden. The so called attack was orchestrated by Putin himself. After Kruchina's "suicide" Gorbachev was the only one who knew were the money where. Yeltsin threatened Gorbachev with prosecution for orchestrating the coup in Moscow and backed off in exchange for the money. And that is when Putin's journey to the World domination began. The business relationships between Russian and German companies grew up. Yeltsin was collecting two percent "commissions" of each deal.Putin was in charge of making sure that those"commissions", that amounted to billions of marks, would be transferred to secret accounts through old KGB channels. He naturally fit to this type of activity as someone who could be trusted by both Germans and Yeltsin circles. The trust was based on the fact that Germans and Yeltsin had documents that tied Putin to treason. And in Russia, betraying once Comrades is the worst label one can have, even if you acted on orders of your superiors or Head of State himself. On November 9, 1992, Soros tanked Bank Of England with \$11 Billion of CPSU money. Putin was in charge of money laundering operation. To the best of my knowledge, Schroder is still in possession of the NOC list that was delivered by Putin. The German business with Russia became a gold mine for Putin. He suggested to Gorbachov that he should take a percentage of the deals that went down between German companies and Russians . Putin's job was to make sure the money would end up in offshore accounts of Gorbachev and his family. He later continued the same operation for Boris Yeltsin. Everything would be untraceable. Yeltsin brought the scheme to industrial levels. The 2 percent became unofficial law,that everybody involved was familiar with. Yeltsin quickly became a billionaire. Putin blackmailed Yeltsin and eventually removed him from power. The introduction of the NSA programs like Prism and others was something Putin wasn't aware of until he was first blackmailed by Bush junior. Once he was blackmailed, he realized the information the President of the USA had on him must have come from a completely new methods of collecting intelligence. His first order of business upon returning home was finding the source of the information. Six months later, he found out. Putin calculates his moves very carefully, taking into consideration every possible decision and action by all the participants. He turned his attention to the programs that the NSA had and focused on penetrating them. He realized he would need information to blackmail the one in charge of the NSA or National intelligence. He learned that NSA had an application that monitors all Market Exchanges. The rest was simply a technicality. If one could intercept the emails from Boeing or Chase CFO to CEO few days before the actual earnings release, lots of money could be made. And Putin knew very well that such a temptation was impossible to conquer. He started to look into top NSA and DNI commanders and their immediate surroundings market portfolios. He found out of mysterious individual who was supplying Soros with all the data NSA collected as part of their application to monitor Exchange Markets. Putin now had everything he needed to start the most brilliant intelligence operation ever.

There are multi level protections guarding all of the complex NSA applications. The codes that contractors like Snowden use are changed on a daily basis. Then there are codes that are used by mid level intelligence management, like FBI Counter Intelligence Unit or CIA Counterterrorism Unit. Those codes changed every week and every month. The codes that Intelligence Agency Directors and Secretaries are using- like Secretary of State through the Bureau of Intelligence and Research or Director of National Geospatial Intelligence Agency- are changed once every quarter. And then there are master codes that only Presidents of the USA, Directors of National Intelligence, CIA and NSA have access to. Those codes were never changed till Snowden fiasco. Although it was widely believed in the US Intelligence community that Snowden and whoever was behind him never had an access to master codes- those codes were changed almost immediately after Guardian and WaPo publications in June, 2013. It was no surprise for Putin and he was ready for it. The amount of data he collected so far was enough to blackmail any politician, judge, journalist or movie star for years to come. But I knew something about Putin that nobody else was able to figure out. He is greedy. 100 billion that he made with over 1000 day trader houses around the globe on different stock exchange markets was not enough. I knew that sooner or later he will need those codes again in order to access the insider info collected by NSA on all major players of world markets. And when he moves, I will be there waiting. He will expose his point men in a highest level of US Intelligence. Mr.X. I was thinking it was Brennan. I underestimated Putin once again. On November 7, 2014 - the anniversary of Communist Revolution in Russia- Clapper handed the Master Codes to Kim Yong Chol - Director of North Korean equivalent of NSA. The time came to get Putin engaged. But not right away. I had to be careful. After all, I was about to start a game with the most brilliant man in the world. The man who can figure out his opponents moves years before they even start to think of those moves. Here is one example just to illustrate Putin's brilliancy. Majority of the communications between agents with Non Official Cover - i.e spies, and Agency they are working for, are done through internet. Usually the information is coded in different articles available on the internet and all the agent has to do is to decode the message. Now imagine that the message is coded in five or six different website articles and each of them have different coding structure. Try to decode your own very simple code, that you, yourself, created, and somebody else used and send you a primitive "How are you doing?" message in email - and see are you able to decode it in your head. Putin can look through all five or six and decode the message, without printing the articles or even looking at the decoding instructions. He does it in his head... I knew that now, more than ever, I had to be patient. If I move soon enough after Clapper visit to NK, Putin will figure out in a second that Clapper is compromised. Like he figured out in half a second that OBL was not killed. I had to wait for the right moment and right time. And what was even more important - I had to hit him so hard that his head would spin. That was the only way that I could establish my second communication channel. The first one - to Obama, Clapper & Co I successfully established a little bit over a year ago. It was time to start to communicate to Putin. As usual G-d provided such a time and moment. Boris Nemtsov was assassinated on Feb 27, 2015. On the 3rd of March I texted myself a few things that definitely would be on Putin's desk within hours, should he had access to master codes. I texted about Kadyrov Junior behind Nemtsov murder. And about Kadyrov Senior behind apartment bombings. I texted how Putin killed Kadyrov Senior, when Anna Politkovskaya unearthed the

details from her GRU source. And how Nemtsov gained access to her "Zhana Cache". The Cache was the result of her 7 years long investigation and provided indisputable proof of Putin's order to blow up 3 apartment buildings in Moscow suburbs and then blaming it on Chechens in order to start a Chechen War. It also had details of the operation to eliminate all the individuals involved in buildings bombings. Including Kadyrov Senior. I texted how Putin used Kadyrov Junior to kill the very men who was holding a proof of person responsible for his father's death. I texted how Ksenia Sobchak was involved. I then described in small details Putin's role behind money laundering for Gorbachev and then Yeltsin. And how he later blackmailed Yeltsin with it. And how he, after Gorbachev's orders, delivered to Germans the KGB and GRU NOC List with name of all Soviet agents in Germany. And how he killed Ksenia's father- Anatoly Sobchak. And then made Ksenia his mistress and his asset. And few other things that would put me on a list of the people that Putin would want to know everything about. As I expected Putin had my texts on his desk within 24 hours. He completely disappeared from public view for almost two weeks. His first reaction was furor. He was once blackmailed by Bush with some of the data I shared and enough was enough. So he was seriously contemplating to start a nuclear war. Thank G-d, Putin is an old KGB fox and the first rule they drill in your head in High School of the KGB is to never make a decision while being emotional. So for the next three days he was simply calming himself down. Then for a week he was analyzing the situation. Those texts could only had 3 possible origins. Obama. Netanyahu. Or somebody inside his inner circle. Putin always new that physical eliminating of intelligence personal was a biggest danger to his stability. But he had to continue the killings to secure that an army of "skeletons buried in his closet" will remain hidden. So over 3000 GRU, FSB, SVR agents was killed during his tenor. After seven days of carefully analyzing my texts he wrote the list of the six names of the people who had access to all of the info in my texts. Director of GRU Sergun was on a list. 9 months later both him and his right hand man - head of GRU Spetsnaz Shushukin - died within 3 days of each other from the same cause - fatigue. So far everything was going by the plan. I just established my second communication channel. On March 12, 2015 I paid a visit to _____ FBI. I had to warn them about Clapper. I gave them my texts and explained them that Putin's disappearance was a direct result of those texts. I also explained to them that Russian Federation did not have the resources to reproduce NSA Programs like Prism in a relatively short time unless they had a blueprints. And at a time they did not had blueprints. So the only way Putin received my texts was if he tapped NSA aps. And the only way he could tap NSA aps after Snowden defected - was using master codes. And that the only man who could deliver those codes was Clapper. Unfortunately at a time the FBI Director was Comey. He could start an investigation that would eventually lead to realization by american lawmakers that Putin now controls all of them with blackmail files he received by using NSA applications they themselves approved to employ. And Comey realized the dangers of such an investigation. So he used my information to advance himself instead.

In March of 2016, a year after my texts and Putin's 10 day disappearance Kerry traveled to Moscow with a mysterious luggage that he carried himself. Inside was a year's worth of investigation by the US government into my methods of collecting the information. Kerry later presented the so called "proof" to Lavrov - the thousand or so articles from Russian internet and newspapers and CIA analysts conclusion- Mr. [redacted] was nothing but an amateur intelligence analyst, who spends his free time in constructing the conspiracy theories. After Kerry departed Putin had a meeting with Surkov. "Truly your ways are inscrutable Lord" Putin said. For it is a miracle from heaven that such idiots as Kerry and Obama are ruling the mightiest country in the world. "Armature analyst! He is as much an analyst as I am a ballerina! All he knows is how to decode messages in seconds. Dustin Hoffman! A "rain man". Well, one thing for sure- Obama is not behind. Kerry did everything but lick my anal orifices to show his bosses loyalty. Plus they are too dumb to play an opening like this. It is obviously one of ours. But Kerry did have one valid point- we allow too much information in newspapers and on the internet. Vladislav Yuryevich, please take this matter under your control. And one more thing - We will have to be extremely careful moving forward. I am sure we will hear from Grossmeister again. (

1). Putin was referring to the main reason behind Kerry visit - the operation "Old New Year" By March 2016 it was obvious that Trump will secure the GOP nomination. In order for his plan to work Putin needed two things most - Clinton to be on Democratic ticket-one. And FBI Counterintelligence investigation on Trump -two. The investigation on Clinton was already on. Putin needed both investigations to go on to secure the final stage of operation "Старый Новый год". In Russia "Old New Year" is celebrated on January 14th. Under Putin's plan on December 1, 2016 Comey would reveal the existence of operation Crossfire Hurricane should Trump be elected. And in case it was Clinton - Comey would actually bring charges against her on same December 1, 2016 based on "Newly discovered evidence" obtained from Weiner computer. Classical Stalin's play. Then, on December 19th, enough Electors from winning party would vote for different than Trump or Clinton candidate that will result in a "Sudden Death" scenario, when neither Trump or Clinton would be able to secure 270 votes. And then, during January 14, 2017 emergency session the Congress would amend a constitution and vote for a law to extend Obama's term for 2 more years. Or declare a National referendum in order to extend Obama's presidency for two more years and scheduling the new Presidential Elections in 2018.

The day was Nov 16th, 2016. The blackmail files on Electors was ready to be delivered to NSA and FBI contractors in few crucial states. Easy op, like the one that took place a few years ago with Justice Roberts exactly two days prior him rewriting the Obamacare opinion. Or the one that was dubbed 'Hope Leadership' to replace the Pope that included monitoring both Pope Benedict and Future Pope Francis as well as all the Cardinals. Once Benedict was forced to resign under the threat of making public among other things the colossal money laundering scheme, the blackmailing of the cardinals begin. As a result a "more friendly to American interests" Pope was successfully installed by Obama to make sure that the process of converting Conservative base in the USA starts from a top - Pope himself. It was my turn to enter the scene. Time to throw a wrench in this play. I texted to myself the following - 1. Kruchina

was killed 8.26.91. \$11 billion of CPSU vanished 2.Soros tanked bank of England with \$11 billion of someone else's money. 3.Soros was losing high prior to NSA enrollment in markets. 4.Someone from NSA - Mr.X most likely Clapper approached Soros around 2001 or 2002. From that point on 5.Soros made up for everything he lost 6.Soros shared developments with his FSB connections. 7.Mr.X got on a Putin hook. 8.Dodd Frank forced Soros to shut down fund in 2011 in order not to disclose donors. Otherwise connection between Mr.X and Putin would be obvious to FBI 9.Clapper went to N Korea to free priest and most likely to deliver the codes to FSB. 10.I start to shake things up 11.Putin killed Shushukin and Sergun 12.Mr.X delivered blackmail files on 80 or so electors 13.There is a Coup in process to blackmail electors so on Dec 19th There will be enough defectors to choose Clinton.It was done in Vatican to replace the Pope , so this is not a new game for the players. 14.Putin bets on uprising and Soros has motions in place to provoke such an uprising by white Trump supporters. 15.America enters a dark age as Putin propels Russia to Super Power. To deflect such a scenario the following steps should be taken 1.House needs to be ready for emergency session on Dec 19th to denounce the Electors vote for Clinton and to ratify the November 8th results. 2.FBI needs to examine immediately Soros donors prior to him shutting down the Hedge Fund and compare those donors to relatives, mistresses and best friends of top 5 NSA officials. 3.FBI needs to obtain a warrant to monitor each and every one of 306 of Trump electors. 4.Someone needs to advise Putin of existence of German files and their content. 5.Putin needs to be advised that those files will be published all over Russia prior to Dec 19th should he proceeds with op. And may G-d help us To protect myself from immediate and not well thought reaction by Putin or Brennan and Clapper I deliberately made few factual mistakes.Like naming Clapper in a game as early as 2001, mixing some dates or writing FSB instead of GRU and pretending that I did not know about "Sudden Death" scenario, when neither candidate would become President. By doing so I gained a week of extra research and analyses by Clapper, Brennan and Co. The 90 percent factual data along with 10 percent of complete dilettantism in my text sparked a debate within the small analytics group as to who I was. At the end they all came to the conclusion that I am a professional, trying to mask myself as dilettante in order to protect those who are behind me. . Within hours of receiving my text Clapper wrote his resignation letter and scheduled appearance in Congress, and, what was even more important - Rogers took a flight to NYC to meet with Trump. Rogers always was nervous about the whole thing. Especially with an FBI Contractors using NSA apps. And much more so after expiration of their contracts with FBI . So he conducted a review and dropped a dime on FBI to DOJ and FISA. At least nobody can tell that he was part of the Coupe, should things go wrong. When he read the 12th paragraph of my text -"Mr.X delivered blackmail files on 80 or so electors" he realized that things are definitely going wrong. Because NSA had records that indisputably prove the access by FBI ex-contractors to emails and phone records on some of the Electors long before my text.He knew that nobody was going to be moving with plan A after my text. He also knew that someone very powerful is running a counter-op and there why Plans B, C,D and so on are doomed to fail. And he knew that it is just a matter of time till the whole use of NSA applications to collect blackmail data on Electors will be brought to light of the day. He thought for a short minute, picked up a phone and called. "Mr.President. Mike Rogers speaking. I wanted to meet you tomorrow if you have time... Oh, I am sorry. This is Admiral Rogers. I am a Director of National Security Agency... Thank you,

Mr. President. I will be there" "Good G-d. He didn't know who I was. G-d help us." Admiral Rogers did not utter this words. He only thought them. After all, he was not so sure anymore that nobody was listening to his every word.

When Obama read my texts he did what he always does under pressure- he started hysteria."I will go to Trump myself and explain to him that he was targeted only because "We" had to stop Putin's blackmailing, and in fact Trump was never in jeopardy" - he shouted at Clapper. "Or is it better to put all the blame on Comey and FBI? Oh G-d... We are all going to jail! I warned you not to get into this mess in Libya. I knew it will backfire. None of you listened! And now this! You all told me that nobody would ever figure this out - all this "brilliant" idea with Trump or Clinton! "All the intelligence gathering will be done by our "friends" abroad, so nobody will point fingers at us. "Intelligence gathering!" It was no intelligence gathering - we spied on next President of the USA. And that's the least of my worries. Thank G-d it looks like he doesn't know what our real plan was! Oh G-d. We are all in trouble! Who is behind?! I am sure it is Putin! Who else would dare! But why?!!!" Clapper knew something had to be done and something had to be done immediately or Obama would dig a grave for all of them.

Obama was referring to a "Sudden Death" scenario where it was immaterial who would win the election. Immaterial because at the end of the day neither candidate will get 270 votes. Later on, when facing the prospect of indictments, McCabe threatened to burn the house and bring everybody down by spelling the details of this plan. Brennan had a secret office that supposedly would keep conversations not recorded. Somehow McCabe managed to have some recordings. That is the major reason he is still not indicted, because he firmly stands on his initial threat that if he will be charged with ANYTHING- even if they guarantee him no jail time and fixed jury- he will burn the house. Including the revelation that Comey was ready not only to charge Trump with treason, he was ready to charge Clinton with espionage should she win. This will go all the way to Obama as it then will become obvious that the end goal was to extend his presidency for two more years. It will expose using NSA application by retired FBI and NSA contractors to compile blackmail files not only on electors, but on members of Congress, Judges, including Roberts, etc. And Obama had all the reasons in the world to be afraid.

Kerry-Lavrov meeting was scheduled for November 17th. The APEC Peru meeting didn't start till November 19th - 2 days later. This was the only instance when Foreign minister of Russia and Secretary of State traveled 2 days before the start of the meeting. Not only they traveled earlier- they didn't even take a shower after flight, once they landed in Lima. "An amateur analyst? A conspiracy theorist, ah?"- started Lavrov. "Looks like we are screwed " Answered Kerry. "Good think my boss thought of possibility." Russian responded. The main thing- your boy is a wimp. You have to stop the panic attack. We have a plan B. And plan C. And plan D. By the time we will enter plan E, Trump will be out of the office. Make sure to calm "Jordan" down. Make sure that he wouldn't try to court Trump with some nonsense explanations. Good enough we have to deal with Rogers. We don't need Obama to flip. He got no other way but to follow the script. John, please, calm him down. Talk to him. Scream at him. Beat him up. Drug him. But make him stop moving all over the map. Have Brennan remind him that he almost lost a

presidency to Romney when he blew the debates after we hacked Bin Laden and he was in the same panic mode. Remember?

Kerry did remember. First two Presidential debates with Romney was a disaster. If Obama blows the third one - it will be over. And a third debate will definitely bring Benghazi in a spotlight. Obama was a great debater and orator. But ever since Bin Laden was hacked from CIA annex in Benghazi Obama was in depression mode. He was constantly blaming everybody for the entire operation of capture and transfer OBL to Libya. Obama was convinced that the lid eventually will blow up and everybody involved, including him, will go to jail. He definitely was different Barack Obama during first two debates. In his had he already lost the election. And that was the smallest concern for him. This is when Clapper intervened. When Obama started to complain again about OBL and how he was against the whole idea, but was pushed into it, Clapper agreed. "Mr. President - you absolutely correct. It was a bad idea. And the only way to fix it is for you to win the election. But you have to become your true self and destroy Romney tomorrow during the last debate."

Easier said than done - answered Obama. What am I going to say when Crowley will bring Benghazi up? That Susan went on television 5 times and blamed the entire thing on Mohammed movie? He will destroy me there immediately.

He will not- answered Clapper. I will make sure he will not. Be yourself. Attack, attack and attack. Don't worry about Mitch. I will take care of him.

How? Asked Obama? And even if you will, what about all the people who know? Seals, communications, NSA and everybody else?

Did I ever let you down? Answered Clapper. And don't worry about anything else. Make sure that you are elected. We will bring Brennan in. He is a specialist in keeping things under the rug. As far as Romney concern - I will take care of him tomorrow morning.

How - asked Obama.

I will provide intelligence briefing for him myself. Answered Clapper.

Obama knew that he at least doesn't have to worry about Romney. He knew Clapper's methods always worked.

Mr. Governor - Clapper speaking. Good evening. Sorry for a late call. Congratulations on your debate performances. Polls are looking good for you. Looks like you will be next Commander in Chief, are?

That is actually a major reason for my call. There is an important information I need to share with you as a Presidential Candidate, that concerns our National Security. It is extremely sensitive and quite frankly beyond SAP. There why I would really appreciate that we conduct next intelligence briefing One-on-One. And no notes, ok.

Sure, answered Romney.

Kerry was still having memory flashlight, when Lavrov asked him - Are you here?

Yes, said Kerry.

Ok, continued Lavrov. We have to intervene or Obama will blow everything up.

Have Clapper convince him that Hilary will be elected after FBI will leak about investigation into Trump- Kremlin connections. He is afraid that someone from Moscow orchestrating this. Explain to him that suspecting Vladimir is insanity. So is to think that someone else on our side will cross Putin. We will organize leaks on our side that will compromise Flynn, JR and couple of others.

Hopefully he will see that Vladimir is with him 100%. Blame Netanyahu. He will believe you. Tell him not to veto anti Israel resolution in UN. Tell him to push hard for Paris anti Israel resolution. Change his attention. Play lira to him. Do whatever it takes. Because if he would not stop the hysterics we all need to pray to Lord to help us.

I taped myself on a shoulder - Not bad for a start. My main goal - to slow down the op and to stay alive- was achieved. At least the plans to arrest Trump on charges of Treason was taken off the table. And they moved to Plan B- Electing Clinton. But it was just a beginning. Obviously there was a plan C in place. And plan D. And even plan E. On November 21, Ohr instructed Strzok and Page of change of plans - "No yet. Push case ahead on M. May go back to Chris". Just in case the Clinton card will not go through they wanted to go after Cohen. Push case on M was referring to Michael Cohen and not to Manafort. To secure the back pedaling of Clinton go ahead game, I countered with November 22 text - Someone need to communicate the following to Mr. President Elect: Mr. President Elect is making a mistake by trying to appease a crowd in hope that by doing so the possibility of 37 defectors diminishes.. When making a move in a chess game one needs to analyse not only the board, but also the opponent. In this case it is Soros. His whole career was built on bullying the markets to the point when investors blink and panic. And it usually worked when there is no strong player who calls his bluff. By playing a "nice guy", whose only desire is to make peace with everyone Mr. Trump is only weakening his position. There are only 306 players in this game. Rest of the world doesn't matter to Soros. As long as he can continue to "short" Mr. Trump and as long as Mr. Trump allowed to be "shorted", the 37 number becomes more and more real. For a simple reason. A person under pressure contemplate all the possible scenarios when he or she is blackmailed. And the only thing that can keep such a person from treason is a possibility of being caught. Mr. Trump's movement all over the desk looks chaotic and thus gives Soros a powerful closing point - vote the other way and nothing will happen to you as this guy is not serious and he already is panicking. The only way to combat Soros is for someone like Bannon to address the media with a statement that there is a possibility of Electors being blackmailed by Snowden type defectors within NSA never Trumpers. He then should state that incoming administration will investigate such cases as an attempt of a Coup and all the parties involved will be prosecuted. He should assure that anyone with info of such an activity should approach the FBI in exchange for a complete and fullest pardon of any crimes committed. He also needs to give assurance that Mr. President Elect will not allow any blackmail files on Electors to see the daylight regardless of what in those files. The best possible case is if prior to Bannon statement there will be a "leak" from mid-level FBI official that there is an info that a possible blackmailing of Electors is taking place and the FBI is investigating. And just to make sure that they completely abandon the whole Electoral poker I texted on November 24th, 2016 - Time to start to flip Hillary electors to vote for Trump. Soros don't have a game plan for this scenario, neither he can counter such a move. Need 12 Democrats to flip. After this text I lost them. There was only five people who had copies of blackmail files on Clinton electors in order to "flip them". If I was real, then one of the them was a mole. They stopped communicating with each other. And that was troubling. I had to know the next step to control the board. So I had to take a risk. On December 4th I texted to myself the following - Petraeus is too deep with Benghazi. Did anyone tell Mr. Trump what actually happened

there? If not, it is about time. This one will require complete disclosure to American people, followed by resignation of everybody involved. Don't forget that nobody can guarantee anything about OBL after Stevens. To even talk to Petraeus under circumstances is a huge mistake. And not reporting to President Elect of those circumstances is a crime P.S The full disclosure is the ONLY way to get US intelligence community as well as for the Department of State to be able to act independent of Putin's approval or disapproval. My text worked. The full disclosure of the op to capture Bin Laden and transfer him to Libya was bad news for all of them. And not even so much because of OBL himself ,or torturing him for info, but for the chain reaction of murders that followed. Starting with Stevens, contractors in Libya, followed by Rolling Stones reporter Hastings and then the Seals that took part in the op and many many others who somehow knew and couldn't keep their mouth shut or was investigating the facts. The latest victim was Vice Adm. Scott A. Stearney. As chief of staff of the Joint Task Force 435, Stearney oversaw the operation to transport OBL from Kabul to Benghazi. He was killed on December 1, 2018. Putin also reacted.He was not sure at all that Netanyahu was behind my texts. Putin to this day thinks that the most plausible scenario is me being a puppet in the hands of opposition to him in highest echelons of Russian Intelligence apparatus or even a member of secret international organization Spies R Us - a small group of intelligence officers that are revolting against their governments practice of killing the very people who gave everything they had serving those governments and then became a liability. But he had to take a Netanyahu card as a possibility, so on November 27th Tatiana Navka-the wife of Putin's spokesman Peskov - performed an infamous 'Holocaust ' skate dance. If Netanyahu involved, he would clearly read the message - "Do you want all the Russian Jews to wear those concentration camp closing?" When Brennan read my texts, he simply lost it. He decided to take Stalin's approach -"No manNo problem". And as I was the man - his decision was as simple as it was stupid. But he was pushing hard with it. And when Clapper firmly reminded him that killing me does not solve the problem at hand, as nobody could guarantee that someone else won't start where I finished , and, what's more important it was obvious that in case of any action against me the consequences will follow immediately. One thing is my texts that only a few have access to and completely different thing is publication of Emmanuel's emails or posting a video with entire OBL capture on internet. Brennan blew up - "Of course you have a luxury to be soft - in worth case scenario you will get 5 to 10 years and be out in 3. Me they gonna electrocute". On which Clapper answered - well, our task under circumstances, is to do everything that we can to block Trump's inauguration. Then we will have time and what's more important - meansto deal with Mr.Gelfand. So Clapper called the meeting with Brennan and Cohen. And no, that was not the CIA Deputy Director David Cohen . It is not the time yet to identify the third person that dined with Clapper and Brennan on December 12th , 2016. Not yet. I don't know if they were completely serious when they discussed the idea of wall to wall brawl with real life casualties between Trump supporters and haters followed by declaration of National Emergency by Obama,or Clapper was simply trying to find out how I will receive the information about the meeting, if I will receive such an info at all. There still was a small chance that I had nobody behind. If that's the case, the Brennan approach might be handy. But Clapper would have to test the waters at least 5 times before he would made a decision.One thing he knew for sure - my memo to FBI on Putin was correct, as well almost everything that I texted so far. So somehow I was privy to the information that was

so much beyond SAP that the chance of me acting alone was very slim. Still he could decided to play me and see how I will react. And if I don't react, then there is a relatively high probability that I simply would not become aware of the December 12th dinner. That would be first test. If I react, then no more tests needed - I am definitely an agent. I don't know even till now was this meeting a serious discussion of throwing America into a fringe of Civil War or Clapper simply was trying to fish me out. At a time I had to take their conversation at face value. So I texted the following - Good G-d. How naive I was. Of course Putin could not play this game without Obama in his corner. Obama was playing Trump card all along. That is why he sabotaged Hillary campaign. That's why he didn't interfere with Comey. That's why he encouraged Comey to make his statement a week before election. That's why he so called "stomped" for Hillary with all his body massage and in between the line massage - don't vote for here. Now the CIA gives a legitimacy for 37 detectors. So nobody can suspect that this was all planned start to begin with. A no Trump vote on 19th, followed by "spontaneous" civil unrest on the 20th as was done in Cairo, escalated to same "sniper" killings in the crowds as was done in Kiev and you have a perfect reason for martial law. Obama is now enjoying an absolute power in the USA, and Putin secures Iran deal and Iran is now firmly in his corner as well as China, Syria firmly in his hands, Turkey and Egypt all at a sudden are his vassals and follow his rule. Only a matter of time US withdraws from Iraq and Iraq follows the suit. France and Germany pledge allegiance to him. The new world order. NOW YOU. THE ONES IN NSA AND CIA AND FBI THAT STILL HAVE ANY MEMORY LEFT OF THE OATH THAT YOU GAVE. IS THAT WHAT YOU CAN LIVE WITH? I KNOW FOR A FACT THAT YOU READING THIS. IS THAT THE FUTURE YOU ARE WILLING YOUR CHILDREN TO HAVE? IS THIS THE COUNTRY YOU PROMISED TO DEFEND? And what you will do when my predictions come true? How will you live your life after? Beware that the destiny of hundreds of Russian intelligence officers killed by Putin because they accidentally run on some compromate material on him, the destiny of Team 8 seals killed on Obama's orders as well as everyone else who had any knowledge or suspicions of OBL capture and transfer to Lydia shortly after - that is your destiny. You all destined to die under the new world order. For one simple reason. YOU KNOW. And nobody who knew about any dictator- be that Sulla, Stalin, Hitler or Putin Was allowed to live long enough to expose their Master. I knew that Clapper will have this text on his phone before I will receive it on mine. It took him a few minutes to process the information. And then he panicked. He picked up the phone and called Pete. Right there and then.-" This is Clapper. Agent Strzok, last time I checked, you are responsible for Counterintelligence, aren't you? Then explain to me please how does Mr. [redacted] has access to all of my communications?! Including my conversations!! In real time!!! He somehow has a knowledge of my conversation with Brennan and Cohen while we are having that conversation. I want to know WHO intercepted that conversation and, what is much more important HOW Mr. [redacted] received the intercept. I want to know whom he is working for. Sure enough, Strzock bragged of his importance to his lover almost immediately. He called Lisa Page and casually informed her that Clapper had a meeting with Brennan and Cohen and sure enough she texted the "exciting" news to McCabe. Three hours later I secured my position with the following text - P.S The only way CIA can have an indisputable proof that Russians not only hacked to DNC and Podesta emails, but also delivered the hacked material to Assange - is if GRU "leaked" such a proof to CIA. If that happened, then most likely the most

important info was obtained by CIA after November 8th. This is what Putin's game plan after Trump clinches Republican nomination and the reasons for Putin giving the proof of his engagement with Assange to CIA 1. Most preferable end is instability in US, martial law and President Obama in power. Putin continues to control American President with a blackmail files that would take years just to read. 2. Clinton becomes President and Putin secures his dominant role in the world arena, by continuing the same blackmailing strategy against Clinton's administration as he had done against Obama's. 3. Despite all the efforts Trump becomes president. Then Putin starts to build a relationship on a high note from the position of a "Friend". And although Putin doesn't have a blackmail files on Trump, the fact that he "Helped" Trump with Assange as well that he is privileged to US most secretive intelligence info, as well as most humiliating info such as CIA op to replace the Pope, NSA surveillance on US senators, congressman, Supreme Court Justice, etc in order to later using the obtained data for Obama to blackmail those politicians goes a long way. If you have any doubts imagine what publishing the emails from Rahm Emanuel to Lerner's boss with an order to suppress Republican donors would do? Or revelation of Blackmail of Supreme Court Justice Roberts for him to change his opinion 180 degrees on Obama care? So while a Trump Presidency scenario is at least plausible for Putin, the blackmail files on majority of US power holders as well as "You owe me " message to Trump pretty much guarantee the Iranian deal, Syria offence, and the remapping of spheres of influence in Russia's favor. The brilliancy of Putin's game is that he is achieving his goals in any possible scenario. Looking back, I am convinced that Trump still standing, and Putin losing entirely on a Global Arena short 3 years later is a miracle from G-d. Because Putin plan was, indeed, brilliant. He calculated every possible scenario. His only miscalculation was Trump. He undermined Trump's stubbornness and a monumental self conviction of being an "extremely stable genius". And "extremely stable genius" can not be blackmailed because he believes in his "Destiny". So when someone ever tried to challenge Trump he went on to crush his opponent at any cost. Rarely, very rarely, he lost. But he learned one thing - you are not always going to win, when you fight. But you fight to the end and even after. Then everybody knows not to mess with you. Pure New Yorkian. And Putin realized that the small dossier of really problematic for Trump documents and recordings that he was able to gather will backpedal on him, should he ever try to use it against Trump. Because when someone blackmails Trump - he hits back. And when Trump hits he hits hard. In Putin's case - \$100 billion hard. And Putin knows that. Going back to December of 2016- Just to make sure that Brennan wouldn't decide to make a move on me on his own, the next day I paid a visit to FBI and gave them the whole thing. Would be difficult to kill me after I spend 3 hours talking to the FBI about the conspiracy to undermine election. Sure enough Strzok was the first to know of my visit, and sure enough he shared everything with Lisa. And , she, of course, couldn't be quiet about it and texted to him at night - who is Pete was smarter than that. He was not about to text her anything. After all he had to assume that his texts are monitored and analyzed. So he answered - No idea. As much as she knew not to discuss anything about me or my texts, she couldn't stop her curiosity. " This texts are quite the....." - she replied. "You're killing me" - was his angry response. FBI agent asked me to email them my texts, which I did on December 14th, 2016. With those emails I effectively killed Plan B and the op with Electors "Moral" decision to vote Clinton was off the table. There are people who think that such a scenario was never

possible, for Congress would never allow it to happen - I have news for you. Majority of our Congressman were already approached and blackmailed and were ready to accept whatever the Conspirators had in store for them. There why you saw the massive exodus of those guys in 2018 election cycle, once I bombarded everybody with my emails. Because my emails went everywhere - to DOJ, FBI, Office of Special Council, Congress and Senate Committees, Judges, Attorney's News Anchors, Senators and Congressmen. etc. They simply could not walk and talk with a straight face, all those "Honorable" Conservatives. So the whole "Electors" thing was put to rest. They now had to move to Plan C - the Collusion and Obstruction. So far everything was going by the plan. With G-d's help I just secured Trump's place in the office until at least 2019. Obama was furious. The last four years of his presidency convinced him that he could pull out anything and get away with it. And at this point he was not even thinking of the consequences that slowly, but certainly would lead to his prosecution. He only thought of the power that was taken away from underneath him. Been almost 100 percent sure that I was Netanyahu's weapon he decided to hit Netanyahu where it hurts. The UN Security Council Resolution 2334 was at least a year in making and stopping it was pretty much impossible. The resolution stated that Israel's settlement activity constitutes a "flagrant violation" of international law and has "no legal validity" and specifically mentioned East Jerusalem. Israelies knew of it as well as they knew that Obama would abstain and allow resolution to be adopted. But the move with January 2017 Paris Middle East peace conference resolution, that would call Israel, among other things an Apartheid State and would call on UN to impose economic sanctions on Jewish State was Obama taking his hatred towards Netanyahu and Israel to another level. The first one to warn Obama was Clapper. If, in fact, it is Netanyahu - argued Clapper, it is better to try to convince him to stop the offensive by mentioning the consequences four or years down the road, when Biden or Warren or another democrat would take the office. The Paris Accord only would infuriate "The Mad Jew" to the point where he wouldn't stop till either him or you standing. Even if the match will have to go 100 rounds instead of 12. Do you really want this fight? That was the first time ever Clapper was so upfront with his boss. "We did make sure that he would never be re-elected, didn't we?" Answered Obama. Obama was referring to a tourist, who dropped a package to Israel Attorney General's office at Saladin 29 in Jerusalem. The package was addressed to Yehuda Weinstein and contained what became later a criminal charges against Israel PM. Two more packages were delivered the same way. One when Yehuda Weinstein still was AG and one to Avichai Mandelblit, who replaced Weinstein in February of 2016. "Yea, we took steps" - answered Clapper. "The only thing is that nothing is predictable in Israel" You, out of all the people should know." But Obama didn't hear the voice of wisdom. Although Israeli affairs was not my forte, the threat of economic sanctions against Israel, supported by American Administration, was a little bit too much in my humble view. And even more so was a counterplaying by Obama decision to recognize Palestinian State during his last days in office. So I shot a warning shot on 12-22-2016 - I texted - Obama should be careful with UN gambit. A lot at stake for him. And Snowden is not the only one who had access to NSA "Video Unit Stuff". I was referring to OBL capture video. I also warned Putin with a text that followed minutes later - Putin should be careful as well. After all Schroeder made a copy of a NOC list with his prints on it. Although Putin gave up the entire Soviet Operation in Germany ages ago, he knew that Russians will not forgive him betrayal of his comrades even if he followed orders. I also had

to worry about Trump not making too many mistakes so I followed with 12-26-2016 texts - Mr. President Elect should explain to Bibi that there is not much he can do to help Israel till January 20th. And if Obama decides to go along with Palestinian resolution he will. Bibi's calls and statements do nothing but undermine both Netanyahu and President Elect Trump. Both UN resolutions and Obama treason will have to be dealt with at a later day regardless of what happened between now and January 20th. Till January 20th President Elect SHOULD avoid any moves on world arena that could be interpreted as weakness. His call to Sisi definitely will be interpreted as weakness by many world leaders in light of Friday UN resolution. And then I shot another round at Obama- Bibi also should be given permission to use whatever embarrassing info he has on Obama personally. Like deleted Emmanuel emails. That if he has any. If not those emails should be dropped on his lap. Nothing that could harm US but something that can result in Congressional inquiry and special prosecutor into Obama inner circle. And possibly into Obama himself. I was sure that my texts would have had an impact on Kerry's December 28th speech. They didn't. I was surprised, if not shocked. And only later on I found out that the reason was simple. They were so afraid of all their communications being monitored that they resorted to a century old practice of hand delivering written notice to each other. I texted at 10.37 PM Eastern on December 26th. They simply did not process the information to Obama in time for Kerry to change his script. The Paris Accord, however, was scrapped completely. Obama practically begged not to disclose the kompromat on himself when shortly after complete Paris capitulation Kerry mumbled that "Israel has no better friend than the outgoing administration" For next year and a half I effectively countered every possible move of what became known as "Deep State". My regular emails to dozens of FBI offices over the country produced the anticipated results. More and more FBI agents, CIA and NSA analysts and contractors decided to take a stance and started to share mine and others information not only with Nunes but also with Hannity, Dershowitz, Levin, Solomon and many others. My goal was simple - at the end a few of the conspirators would realize that ALL their communications are recorded, ALL their emails and texts are copied and will become public, should a necessity occur. And once they do realize it, they will start to rat each other out. And then the only thing left is to have the other Special Counsel or US Attorney appointed to look at the possibility that it actually WAS a Collusion. Even bigger than Collusion. That it was a successful GRU op to undermine the US supremacy and to try to wreck havoc in the world. So I emailed my texts and emails to William Barr. I did not need to send him explanations. One of the most brilliant analysts Intelligence World ever had only made one call after reading my emails. "Hi. This is Barr. I have a puzzle to solve. Do you remember mentioning any of the following to your Russian friend - Russians German NOC list Sobchak Apartment bombings in Moscow prior to Chechen War Kadyrov His "business" dealings." "The NOC list.... And the money" - answered Bush. "We have a situation. I need your advice..." Despite the appearance of mid IQ Cowboy, 43rd President of the USA is far more intelligent than you might think. He knew that Barr didn't need an advice. What he needed was the access to ALL the intelligence data. NSA especially. And George W Bush had such an access. Even when they changed master codes, he was given a new ones. 'Sure thing. You know where I am at. Stop by anytime. I am bored anyway.' "The first thing that Barr looked at was the OBL-Stevens-Petraeus-Brennan. He already knew that I was right, he just had to have an indisputable proof to go after President of USA. He was not coming

after Obama without 100 percent guarantee of his personal safety. An order to transfer OBL to Benghazi convinced him that he had such a guarantee.

----- The entire Ukraine Call Impeachment plan was the last and desperate move to stop the inevitable - Barr's DOJ. This part was added on September 1, 2019. I emailed a version on September 2, so no questions can be raised later on on the date. That email, as well as my texts to [REDACTED] between August 8 and August 13 - when the entire plan was only known by a few- prompted the report that Israel is collecting info through StingRays, planted around Washington. The Politico reported this on September 12th. I visited Israeli Embassy in Washington on September 10. My visit had nothing to do with US affairs - I hand delivered the Russian Intelligence polling of Israel's upcoming elections along with 22 different gameplans Putin had in order to set Netanyahu up. 8 days prior I send an email to give Bibi heads up - This is a copy of an email that I send on September 2, 2019 - Avigdor Lieberman was approached by KGB in 1975 and agreed "помогать органам государственной безопасности в выявлении антисоветской агитации среди студентов и персонала Кишиневского Сельскохозяйственного Института" KGB communications referred to him as "Светик" Putin have two theories as to whom I represent. The main one was that I am a part of internal resistance within Russian Federation Intelligence Community. The second one was that I am an Israeli agent. He recently changed his assessment and inclines to believe that Prime Minister Netanyahu is behind my activity. Not that Prime Minister decided to pick the President of Russian Federation to mess with, but as a result of carefully calculated risk assessment, that shows the Iranian threat as most urgent factor in determining Israel's long term security and even survival. Lieberman is acting the way he does recently, because of Putin's doubts that after all the killings of Russian Intelligence prominent figures anybody in their right mind would dare to continue. As a result, Putin is looking hard at Netanyahu. He has few Israel scenarios for next few months. 1. Lieberman will not join anybody and as a result Israel will be throwing in the uncharted territory of prolonging constitutional paralyze. Something Putin wanted to do in the USA in 2016. 2. Lieberman will join Gantz and Netanyahu will be convicted and imprisoned. 3. Lieberman will join Netanyahu and defect in a most crucial moment. The third one is the most unlikely at this point. In March of 2014 I informed Moshe Ya'Alon of the talks by Obama State Department Officials to take a harsher stand on Israel. Obama asked to research what the consequences in a Jewish and non Jewish vote for Democratic Party will be, should US Abstain instead of Veto some of the anti Israel UN resolutions. I further provided info of Putin blackmailing Obama through Snowden and with videos of OBL, who was captured in Pakistan and transferred from there to Afghanistan and then to CIA annex in Libya. The butchered by Petraeus Benghazi fiasco was the op to eliminate double agent Stevens, who delivered OBL to russians. You are probably familiar with some of my activities that I undertook to thwart the Anti Trump Coup. I delivered some texts, emails and other documents to NYC Consulate two years ago. I am including the short brief that will help you to put certain dots together. In case you will need the additional texts, emails, etc - I am pretty sure you will be able to communicate it to me. And last thing - before Prime Minister makes a phone call to Putin, ask one question - would it change anything? To a positive column. Thank you [REDACTED] This part was added on September 1, 2019 - I trained myself to be

prepared for virtually any possible scenario. It is difficult for someone to surprise me. But their next move did really surprise me. In any game there are rules. Some official and some not. And sometimes unspoken rules are the unbroken ones. This time they cancelled all the rules and went all in. And it means real trouble for Trump. If they are allowed to play this card, then impeachment in a house and Conviction by 80 percent in Senate is all but guaranteed. I Don't think Putin is involved with this one. They simply stumbled on it and at first didn't even figure out the whole thing. But they will- sooner or later. And unfortunately, I will not only have to take certain steps that I really hate, but also will have to translate to Trump what I am doing. After all the betrayals, he is at the stage that he doesn't trust anybody and surely will take my actions as another set-up. On July 7, 2019 I texted myself the following - Brilliant move with Epstein. Paulsen attack variation. Sacrificing queen for checkmate". I was not talking figuratively. I was referring to Queen and her court. After Trump's visit to England, the prospect of watching Prince Andrew Windsor's porn movies might be too hard for president stomach. This was a message to Barr. Within hours he changed his decision to recuse himself from Epstein case. On July 17, I followed with the - "When did Mueller attend Epstein's party? The were no texts between July 17th and July 19th when I warned of imminent Epstein's assassination - I texted "Are you going to wait till it's too late? Like with Kim? Don't you see who is pushing the buttons?" I don't know why Barr ignored my warning and it does bother me, especially knowing that Lamine N'Diaye was assured of \$5 Mln book deal. What I do know, is that steps were taken to copy everything Epstein had. After all it was not as difficult thing to do as hack Iranian nuclear documents. The next thing was really disgusting for me to do. I always hate to deal with people I despise. S

converted to Islam not because of his love to Muslims or religion of Islam. He doesn't believe in G-d at all. He converted for one reason - he hates America, Jews, and Western dominance. For same reason he chose to work for Putin's controlled RT and chose to do favors for GRU. And because of what he is, he became a very important figure for me. I had to send a message to certain people. And he was the perfect vehicle to deliver such a message. I texted him my November 8, 2016 and December 12, 2016 memos and explained to him - After my November 16, 2016 memo 3 things happened 1. DNI Clapper resign within 2 hours 2. NSA Rogers, without communicating his actions to either Obama or Clapper, jump a plane to take a trip to NYC to meet with Trump. 3. Kerry had an emergency meeting with Lavrov in Lima APEC conference. Conference started on November 19th. Both Kerry and Lavrov was there on 17th. Immediately after intercepting my December 12, 2016 memo Clapper called Strzok and requested all the info FBI CI unit had on me. Over the last 4 years I effectively countered every move by Putin and his minions in US to undermine American Democracy. Many people were killed because of suspicions that I received info through them Among those killed by Putin 1. GRU Director Sergun 2. Head of GRU Spetsnaz Shushukin 3. GRU Director Korobov 4. Putins assistant Evorykin Many other Russian Intelligence officers Here in US 1. 14 Seals that took part in Abbottabad operation of OBL capture and subsequent transfer to Benghazi 2. Rolling Stones reporter Hustings who was digging into the matter and was getting to close to Patraeus communications. 3. Ambassador Stevens- a CIA operative who delivered OBL from CIA annex to Russian consulate in Benghazi 4. American contractors that disobeyed the orders to stand down during the Benghazi butchered op to kill Stevens 5. Admiral Stearney, who, as a chief of staff of Joint Task Force 435 oversaw the transfer of OBL from Afghanistan to Libya. Putin

blackmailed Obama through Snowden disclosures. For example Snowden statement that Abbottabad op was videotaped by NSA satellites and that DNA was taken from OBL to proof it was him effectively killed the Obama administration action in Syria after Assad used gas. What Putin was saying to Obama- one bullet over Damaskus and the entire world will see the NSA video of OBL taking alive and escorted to helicopter I have a script. "Russian Gambit " And hundreds of emails, texts, faxes, letters, etc. He responded, we continued for a few days, I shared with him a lot of data, he was reporting our conversations to precisely the people I wanted him to report and then, after Epstein's murder , I delivered my closing point - in a series of texts I explained to the people on the other end of the wire the connection between Epstein murder and the Video Library he had. And in no uncertain terms warned that should the latest game plan against Trump be executed, then all those tapes will be played again and again for people all over the world to see. Nobody would be spared. And the Democratic party will probably cease to exist after it. I don't know would that stop them or not. I hope they would rather give up Comey, Brennan and company and settle for a fair election. I, personally, wouldn't want those tapes to ever see the light of day. Because if they will, then we will witness market's collapse so big that Great Depression would look small.

Added on 11.04.2019 I really didn't care much about Bret Kavanaugh. To be honest I think that Trump picking him up was a mistake. But in September of 2018 it made no difference. Kavanaugh's confirmation spectacle was a key to Senate majority. Should Schumer be successful in taking Kavanaugh down - Senate would flip to Dems. Then impeaching Trump in Congress would be just a technicality, that would follow by majority of Senators to vote for impeachment . Even without 66 Senators that are needed to actually impeach - the pressure would be enormous for Trump to resign. And even if he wouldn't - his chances in 2020 would be dim. The whole theatre with additional week of delay in confirmation vote for additional FBI investigation was played in order for two other witnesses to bring some other crap against Kavanaugh. Only this time it would be 10 year old crap instead of 30. I took some risk at exploring my sources by sending this email on September 30, 2018 - "There are intense preparations of two witnesses to new accusations to make sure that they won't be caught on lies to FBI. Intel guys involved. Most likely the devices along with emails and texts used for communications will be destroyed shortly . Senate will have to subpoena the phone records as well as NSA records under bulk collection to get to the bottom of this conspiracy. Need to get all texts, emails and phone communications from everyone involved. Start with attorneys." Ex DOJ General Counsel Baker was semi-involved. His reaction to the content of my email was similar to one of Admiral Rogers - to many coincidences he said while dialing Congressman's Meadows number. His famous 'explosive' testimony about 'abnormal' handling of Russia probe into Trump campaign was given on October 3, 2018. Kavanaugh was confirmed and GOP not only retained the majority in Senate but managed to increase it.

Zeliskiy is a threat for many reasons. He can expose Obama's involvement in regime change in

2014. He can start to investigate Joe Biden's corruption. Such an investigation would be disastrous not only for Biden, but for many other people as it will ultimately uncover a lot of activities behind the conspirators attempted coup against duly elected President. And, what's more important it can uncover Obama and Putin's cooperation in the areas that would be damaging for any democrat. So when I found out that an attempt on his life would take place within 12 hours I had no choice but to act. The text dated April 14, 2019 was the warning of assassination attempt on Zelinskiy. The actual attempt on his life was neutralized 12 hours later. Putin stepped in immediately after reading my warning. Although Zelinskiy holds enough info to hurt Putin's minions here in the US, to him Zelenskiy is much more valuable alive, as a pragmatic politician that have enough support in Ukraine electorate to normalize relationships with Russia, put an end to bloodshed in Eastern Ukraine and close the Crimea issue once and for all. On April 15th text I explained why Zelinski represents the threat to the conspirators. It was risky, but I really had no other choice there. Trump also read my text. So now we have an impeachment proceedings because of it. Luckily the reality is way more rosier for Trump than original analyses I had at my disposal.
